Dynamify Wireless Dermatoscope

The future of digital skin examination

Wireless connection without the Internet

Cam

The Cam communicates directly with the Cube via WiFi. This makes your system fast, secure and stable. All photo functions can be controlled directly on the camera.

Cube

The Cube is a small server that makes the application available on any browser within the practice network – no Internet connection required. All patient data is stored on it.

Application

The application is the software provided for your precise image documentation. It can be accessed from any workstation within the network via an up-to-date browser.

Special features of the Dynamify Wireless Dermatoscope

Small device, great flexibility

Use your digital dermatoscope wherever and whenever you want

A small but powerful device: The convenient Dynamify Wireless Dermatoscope allows you to move around your practice premises wirelessly and freely. A new dimension of freedom at work you will no longer want to do without.

Outstanding technology at an outstanding price

Dynamify makes digital dermatoscopy affordable

Would you like to make state-of-the-art medical devices available to your patients without stretching your budget? Discover outstanding quality at an attractive price with the Dynamify Wireless Dermatoscope. Dynamify makes the latest generation of digital dermatoscopy affordable.

Simply more dermatoscopy

User-friendliness is our priority

You will be impressed by how easy the Dynamify Wireless Dermatoscope is to use: The devices and software are intuitive and require no time-consuming training. This allows you to focus on what really matters: your patients.

The Dynamify Wireless Dermatoscope

Quality is important to us!

Dynamify Service

Two hours of remote and telephone support within the first year as well as updates for two years are included in the purchase price of the system.

Device protection

We offer an optional four-year insurance policy for the device. The policy covers both defective electronics and damage from dropping. In the event of damage, the device is replaced quickly at a small excess fee: a refreshing change from laborious repairs or a replacement purchase at full price.
