

## Versatility in New Design

### **INSUFFLATOR Highflow 45**

High-power insufflator  
with modular profile

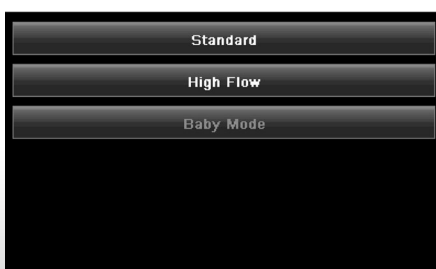

# INSUFFLATOR Highflow 45

Versatility in New Design

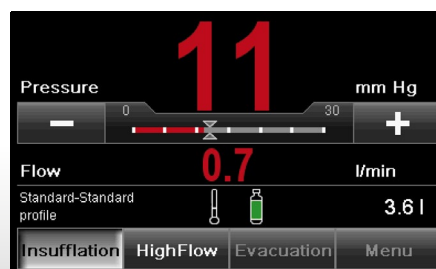

Operating status gas heating ..... Gas consumption  
..... Gas reservoir

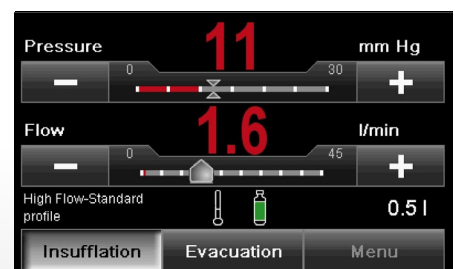

**High-performance is the platform for perfect results.** Alongside enormous flow capacity, the new insufflator generation from Richard Wolf provides the user with four individual needs-based hardware versions and an intuitive operating concept. This saves time, improves control and provides outstanding support for the surgeon. You can experience the new versatility now.

Mode selection

Primary insufflation: Large pressure display

High-Flow Insufflation

## Controlled maximum performance

A flow rate of **max. 45 l/min** always provides adequate performance reserves in order to master every situation. Precisely as controlled as the circumstances require.

## Modern equipment

- **Gas heating.** CO<sub>2</sub> is heated to body temperature – this is particularly effective for babies and infants. The heated CO<sub>2</sub> also prevents the familiar misting of the telescope and provides unimpeded vision.
- **Smoke extraction.** The harmful smoke produced when working with HF current is extracted and filtered. This also significantly improves the image quality.

## Precisely your profile

The INSUFFLATOR Highflow 45 offers preset profiles for standard laparoscopy, gynecology and urology. User-specific profiles with individualized settings (and languages) can also be defined.

## Programmed for success

- **core** line for integration in the digital operating room from Richard Wolf.
- **Video display** for continuous display of pressure and flow in the operating room monitor (in combination with ENDOCAM Logic HD).
- **BABY MODE** for laparoscopy on babies and infants: very accurate flow setting (in 0.1 liter increments) and pressure limiting.

## Everything in view

- Large touchscreen for better overview and efficiency.
- Intuitive menu navigation so that you can concentrate on essentials.
- Automatic adjustment of display brightness to ambient light.

## Your mode of choice

- **Standard Mode** for access with the Veres cannula.
- **Highflow Mode** for access in conjunction with minilaparotomy.

## Suiting all requirements

Make your selection from four hardware versions:

- **BASIC**
- **EVAC** with smoke extraction
- **HEAT** with gas heating
- **EVAC+HEAT** with smoke extraction and gas heating

## Tool-less connection

Easy connection of the INSUFFLATOR Highflow 45 to the gas bottle or the central gas supply – entirely without tools.

## Overview of Versatility

spirit of excellence

Insufflator Sets		Software modules (optional)
   	<b>INSUFFLATOR Highflow 45 BASIC Set</b> Comprising INSUFFLATOR Highflow 45 BASIC (2235001), power cable (2440.03)..... 22350012	<b>Software module CAN BUS</b> CAN BUS interface for integration in CORE.....2235101
	<b>INSUFFLATOR Highflow 45 EVAC Set</b> Comprising INSUFFLATOR Highflow 45 EVAC (2235011), power cable (2440.03), single-pedal footswitch (20301031)..... 22350112	<b>Software module BABY-MODE</b> BABY MODE for special application in pediatrics .....2235102
	<b>INSUFFLATOR Highflow 45 HEAT Set</b> Comprising INSUFFLATOR Highflow 45 HEAT (2235021), power cable (2440.03)..... 22350212	<b>Software module VIDEO DISPLAY</b> Video display using DIALOG via CAN BUS .....2235103
	<b>INSUFFLATOR Highflow 45 EVAC + HEAT Set</b> Comprising INSUFFLATOR Highflow 45 EVAC + HEAT (2235031), power cable (2440.03), single-pedal footswitch (20301031)..... 22350312	
Accessories		
Tube sets for insufflation		Accessories for gas supply
For BASIC	Insufflation tube High-Flow, D = 8 mm, autoclavable, 2.5 m ..... 8170.232	<b>Connection hose, quality connect</b> CO <sub>2</sub> , 1,5 m NIST-NIST ..... DINCO2NIST-NIST1.5 with <b>Pressure reducer Qualityreg CO<sub>2</sub></b> DIN 477-1 .....DM-DIN6-MS-NISTCO2 DIN EN ISO 407 PIN INEX..... DM-PIN-MS-NIST-CO2 ISO 5145 ..... DM-ISO-MS-NIST-CO2
	Insufflation tube Standard, autoclavable, 2.5 m ..... 8170.101	
	<b>Insufflation set</b> Insufflation tube with filter (PACK = 10 pcs) in individual sterile packaging ..... 2200/48bikbtua123	
	Insufflation filter, pack of 50 ..... 6421/04BAUA0010001	
For HEAT	<b>Insufflation tube (pack of 10) High-Flow, with heating spiral and integrated hygiene filter, single use, packed singly, sterile, 3.0 m ..... 4170502</b>	<b>Connection hose, quality connect</b> CO <sub>2</sub> , 5,0m DIN for central CO <sub>2</sub> gas supply (Dräger) .....RW-CO2-ZGV-NIST5.0
	Insufflation tube High-Flow, with heating spiral, autoclavable, 3.0 m ..... 8170202 Up to 100 applications are possible with reusable tube.	
	Insufflation filter, pack of 50 ..... 6421/04BAUA0010001	
For EVAC	<b>Smoke gas evacuation tube set, sterile</b> pack of 10, single use ..... 2200/72BTUA1230001	<b>Connection hose DIN, CO<sub>2</sub></b> ZGV plug to NIST fitting, ISO-colored, 1.50 m long (Ceiling light) ..... DIN-CO2-ZGVNIST1.5  <b>Quick plug adapter NIST</b> (2 pcs. recommended), DIN with safety chain, Adapter NIST / coupling with chain and ring ..... DM-AD-CO2NISTDINKU
